

Dear Dr. Rozbruch,

Now that I have healed to a point where I can go on extended walks, I walk everywhere, as much as possible. I am happier because I can be more active and more productive. I have been able to realize my dreams of taking long tours of the museums and Central Park with my daughter, Isabela. Recently, we have gone hiking and even ice-skating! Words can't explain how grateful I am to be able to do these things and share these experiences with my family. You have changed my life completely and I will be eternally thankful.

Sincerely,
David P.
