

You may recall that two of our sons, Tom and Ed, recently had surgery under Dr. Rozbruch for limb lengthening of the tibia and femur respectively,

We would like to express our thanks and appreciation for the wonderful care they both received at HSS. Tom had a serious car accident nearly 5 years ago, since when he has had multiple major surgeries (over thirty ) in Miami and London to rebuild his leg. But none of the care he received in either Miami or UK compared even remotely with the total professionalism of our experience at HSS. The nursing staff were wonderful, the Ambassadorial Service was something we had not experienced anywhere else in our travels with Tom and were tremendous at helping us navigate our way around the system and everyone we met was friendly, caring and keen to help. But a special note of thanks to Dr. Rozbruch and his clinical team, without whom none of this would have been possible . For the first time in nearly 5 years Tom is free of pain, positive and looking forward to living his life to the full. The surgery could not have been more successful and Dr. Rozbruch was always available to answer even our smallest concerns. We are hugely grateful to him and very appreciative of all he has done to help Tom

Edward's surgery was equally successful and again, this marks a fresh start for him after many years of pain following a skiing accident. The care he received was of the same high standard as Tom's care and again we are tremendously grateful and appreciative

We are huge fans of HSS and Dr. Rozbruch, in particular.

Best  
Karen
